

Content< Message\_content\_t, String >

Message

```
graph BT; Message --> Content["Content< Message_content_t, String >"]
```

The diagram illustrates an inheritance relationship. A box labeled 'Message' is positioned below a box labeled 'Content< Message\_content\_t, String >'. A vertical arrow points from the top of the 'Message' box to the bottom of the 'Content< Message\_content\_t, String >' box, indicating that 'Message' inherits from 'Content< Message\_content\_t, String >'.
